Issues & Findings

Every issue includes the problem, why it matters, and a concrete fix.

On-Page SEO (2 issues)

WARNING Meta description too long (200 chars)

? 10 min

PROBLEM Meta description is longer than 160 characters.

WHY IT MATTERS Google truncates descriptions around 160 characters; the most important sentence ends up clipped.

HOW TO FIX Trim the description to ?160 characters. Front-load the value prop and keyword; cut adjectives.

WARNING 15 image(s) missing alt text ×15

Alt text improves accessibility and image SEO.

Performance (1 issue)

WARNING Response compression not detected

? 20 min

PROBLEM No Content-Encoding header (gzip, br, deflate) on the page response.

WHY IT MATTERS Without compression, HTML/CSS/JS payloads are 3–5× larger than needed — slower TTFB, slower LCP, and wasted bandwidth.

HOW TO FIX Enable gzip and/or brotli at the web server level (nginx: `gzip on;` + `brotli on;`; Apache: `mod_deflate` / `mod_brotli`; Cloudflare: enabled by default).

Security (1 issue)

WARNING Missing Content-Security-Policy header

? 30 min

PROBLEM A security or SEO header is missing from the page response.

WHY IT MATTERS Modern browsers and crawlers expect security headers (HSTS, CSP, X-

Frame-Options, X-Content-Type-Options, Referrer-Policy, Permissions-Policy). Missing them weakens defense-in-depth, sometimes blocks rich integrations, and signals to crawlers that the site isn't maintained.

HOW TO FIX Add the named header in your web server config (nginx ``add_header``, Apache ``Header set``) or application middleware. Start with: ``Strict-Transport-Security: max-age=31536000; includeSubDomains``, ``X-Content-Type-Options: nosniff``, ``Referrer-Policy: strict-origin-when-cross-origin``.

E-E-A-T (3 issues)

WARNING No About page detected

? 2 hrs

PROBLEM No /about, /about-us, or equivalent page linked from the homepage.

WHY IT MATTERS Google's Quality Raters Guidelines explicitly look for About pages to assess Expertise, Authoritativeness, and Trust (E-E-A-T). YMYL (Your Money or Your Life) topics especially need this.

HOW TO FIX Create an About page with: who the company/author is, what they do, where they're based, who the founders are (with photos and bios), and how to contact them.

WARNING No Contact page detected

? 30 min

PROBLEM No /contact or equivalent page linked from the homepage.

WHY IT MATTERS A discoverable contact path is an E-E-A-T trust signal AND a legal requirement in many jurisdictions (UK, EU, AU). Its absence flags the site as low-trust.

HOW TO FIX Add a Contact page with a real email address, phone (if applicable), and physical/registered business address. Link it from the main nav or footer.

WARNING No Privacy Policy detected

? 2 hrs

PROBLEM No /privacy, /privacy-policy, or equivalent page linked from the homepage.

WHY IT MATTERS A privacy policy is legally required if you collect any personal data (cookies count) under GDPR, CCPA, and similar. Its absence is both an E-E-A-T negative and a regulatory risk.

HOW TO FIX Publish a Privacy Policy covering: what data you collect, why, how long you keep it, who you share it with, and how users exercise their rights. Link it from the footer.

Passed Checks

On-Page SEO (5)

- Title tag (55 chars)
- Single H1 tag
- Heading hierarchy (H1 ? H2 × 10)
- Open Graph tags present
- Twitter card meta tags present

Content (1)

- Deep content (~1350 words)

Security (3)

- HTTPS enabled
- No mixed content
- 4/5 security headers present

Technical SEO (7)

- HTTP 200 OK
- Canonical tag present
- Page is indexable
- URL uses hyphens (no underscores)
- URL length OK
- robots.txt found
- sitemap.xml found

Mobile & UX (1)

- Viewport meta tag present

Structured Data (1)

- 6 schema type(s) found: ProfessionalService, OfferCatalog, WebPage, Organization, WebSite, FAQPage

E-E-A-T (1)

2 social media link(s) found
